TO: SAIGON INFO DIRECTOR.

INTEL

SAIGON FOR

REF: SAIGON 84396 -IN 51434

THIS IS FROM IAS

IAS AGREES WITH SAIGON'S DESCRIPTION OF THE WEAPONS IN QUESTION AT NINH XA ARMOR PARK. THE WEAPONS ARE SELF-PROPELLED ARTILLERY USING A T-34 TYPE CHASSIS. A FIRM IDENTIFICATION OF THEIR FUNCTION, (AAA OR FA) CANNOT BE MADE AT THIS TIME. HOWEVER, THEIR DEPLOYMENT IN A GROUP OF FOUR AND IN PREPARED REVENEMENTS SUGGESTS AN ANTI-AIRCRAFT ROLE. THE APPROXIMATE 14 FOOT LENGTH OF THE SINGLE TUBE INDICATES A CALIBER LARGER THAN 37 MM. TO OUR KNOWLEDGE, THE WEAPONS IN QUESTION HAVE NEVER BEEN SEEN IN SOUTH-EAST ASIA BEFORE.
